and Water Management*

Upscaling Nature Based Solutions

A government's
perspective

Cees Brandsen
June 27th 2018

Rijkswaterstaat's area of management

Rijkswaterstaat is in charge of three national infrastructure networks

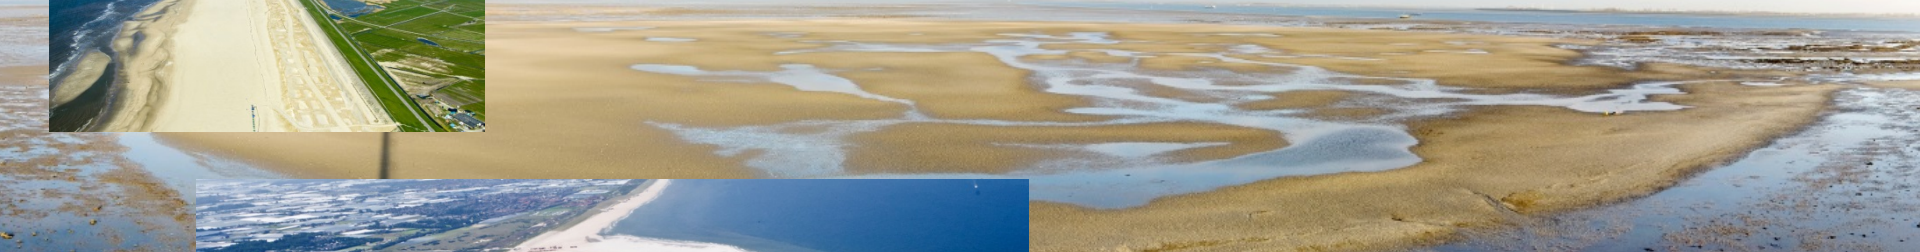

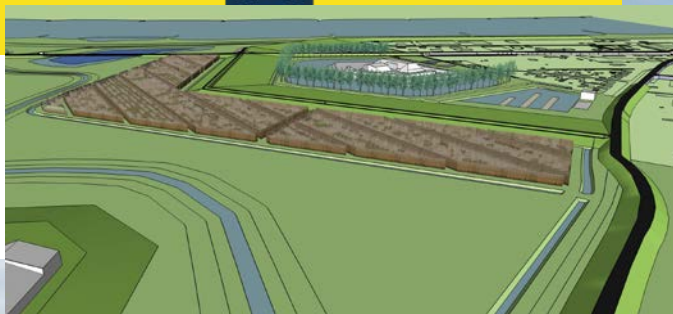

Hard solutions

Dynamic environment

NBS and RWS

Rijkswaterstaat
Upscaling Nature Based So

The technical: upscaling requires certainty

- Predictability of behaviour
- Life cycle information
- Adaptive asset management

The financial: upscaling should yield

- Cost-benefit relations
- Ecosystem services on a comparable and transparent basis
- Connect to SEEA and CICES

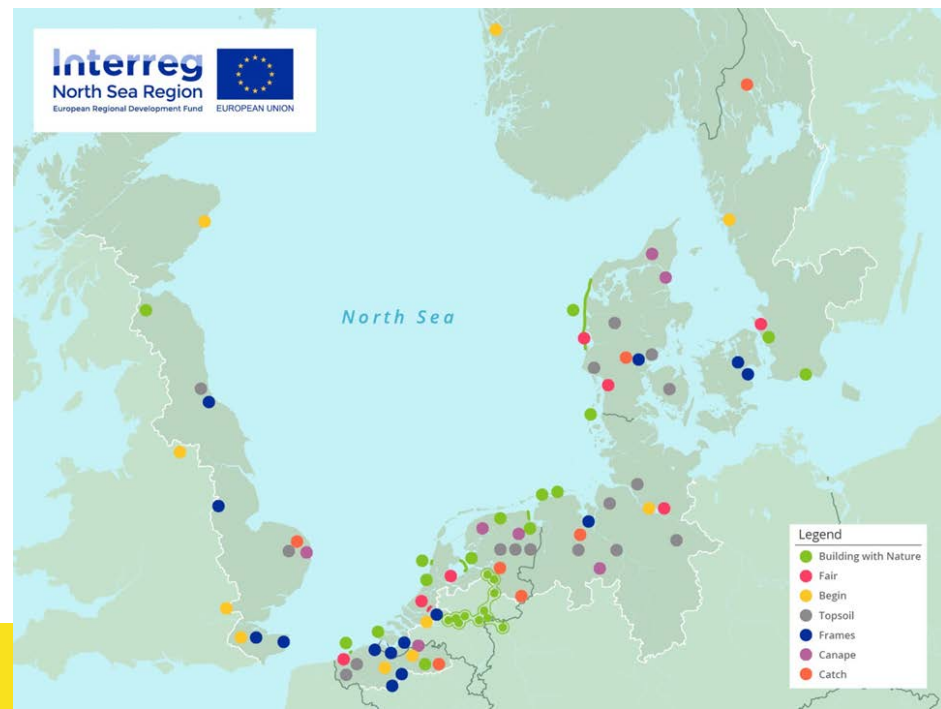

Governance: upscaling requires others

- Work locally: co-create and group think
- Make decision makers aware and confident
- Policy Learning Groups

Upscaling by international cooperation

- Exchanging data
- Exchanging ideas
- Coming to common ground

Rijkswaterstaat considers upscaling of NBS as vital for a sustainable future
